

Modulus Solaris

A Little Bit of Sun

Our battery is equal* in power capacity to a macbook pro.
Imagine if we could use lithium technology

*Accurate to within .5 Watts

Charge iPhone 6s Plus at least 42 times on a single charge.
And that's using the smallest, cheapest, weakest battery we could find.

Compact, Modular:

Take only what you need

Automatic Angle Adjustment:

Maximizes energy collection

Scalable:

Use any solar/battery configuration!

We make it smart.

All Day, All Year

Foldable, Weatherproof design.

Parts List

Monocrystalline Solar Panel x2	159.99 ea.
Inverter	25.99
Arduino+Sensors	~40
Voltage Controller	12.99
DPDT Switch	7.99
Motor	15.99
Battery	25.99
Total Estimated Cost:	470

If every residence in Cook County had our system...

We would cut the residential energy demands by 10%, and more than triple the current renewable output of Chicago.

Our system can pay for itself in a year.

Do It Yourself! Save the Planet!
We Can Help.
